

Fields 900

Fields 900 has been developed for use in the turf industry for applications where zero calcium carbonate is critical.

Fields 900 exhibits excellent drainage and particle distribution for use in field drainage systems, sand top dressing applications and turf replenishment.

The product performs well in high rainfall locations due to its high hydraulic conductivity.

Technical Specifications

Hydraulic conductivity (mm/hr)		Fields 900 1190
Particle distribution	Sieve Size (mm)	% Composition
Coarse gravel	4-8	0.0%
Fine gravel	2-4	0.2%
V. Coarse sand	1-2	9.3%
Coarse sand	0.5-1	36.2%
Medium sand	0.25-0.5	42.2%
Fine sand	0.125-0.25	11.3%
Very fine sand	0.063-0.125	0.7%
Silt + Clay	<0.063	0.1%

Test results from SSDM 14/ 09/09

Fields 900 is available throughout the greater Auckland region in quantities ranging from 40 kg bags to truck and trailer loads by arrangement.
