

## ROADING AND INFRASTRUCTURE

### Roading Applications

Red Rock sealing chip applications provide visual and audible breaks for motorway edges and minor road applications. Our sealing chip SC 10/5 has been specified in the Auckland civil contracting market for over 30 years and in Pauanui Ocean Resort since 1967.

Red Rock has been used in a number of sealing applications and bitumen mixes including; sandwich, and racked in systems. For further information in this area call 0800 RED ROCK.

### Sealing Chip 10/5 - Technical

ALD mm:	5.99 mm
% within 5 mm of ALD:	92%

Source Property results available on application

### Traffic Islands

Red Rock concrete mix is frequently specified for traffic islands in the Auckland area. Red Rock mix contrasts well with island edgings and provides effective visual cues for turning motorists. Mix designs are available on application.

### Distribution

Red Rock concrete mix and Sealing Chip is available from yards in the Auckland region and deliveries can be arranged within 24 hours for the upper north island. To discuss your requirements in other regions in New Zealand please call us on 0800 RED ROCK or (09) 820 3588.

### Service and Support

Red rock products and services are delivered in conjunction with Allied Concrete.
